Partner with iSOA for IBM API Connect migrations

December 20, 2022

Have you put off migrating to v10 of API Connect? There is no time to waste to get started with the migration!

Let iSOA Group's experts ease you through the migration experience

Wouldn't it be beneficial to know what to expect from the migration? Having first hand knowledge on what challenges you may face without even allocating resources or procuring systems? That is what iSOA Group's API Connect Migration Assessment will do for your company.

iSOA Group's highly skilled technical migration team has worked with multiple clients performing various migrations. We have the skills, tools and experience to give our clients confidence to get the migration job done right.

We wrote the book on API Connect v10!

Why migrate?

Version 5 of API Connect reached end of service in April 2022. If you still haven't migrated, you are either running un-supported or on a costly service extension which will end soon. The migration is not a simple version replacement of v5, but a complete rewrite, which requires an experienced partner. Here is what some of our customers have stated:

1. Having a knowledgeable consultant with API Connect migration experience reduces the technical questions we have about the migration
2. Our dates are compressed and we need to be guided so we can quickly achieve the migration goals.
3. We have multiple testing teams we need to coordinate and we need to stay on course.

The Migration Assessment will provide a road map and determine the level of complexity of your environments. This gives you a better understanding of what is involved and the timeline to accomplish the migration.

What to Consider

When working with our clients on their migrations we often found that their operational teams were often under skilled and not prepared to support a v10 container-based upgrade. In our experience, ignoring this critical requirement can have considerable impact on the success of the migration. A consultant can really bridge the knowledge and skill gap. *So how can you mitigate the risk?*

iSOA Group - API Connect Migration Assessment

iSOA Group has been successfully providing migration services for IBM's API Connect for several years. With experience in V5, V2018 and V10 implementations, we know the key differences between each version and how you can best take advantage of the new features while successfully migrating to the latest release. And we do this all while delivering services 100% remotely!

Let iSOA Group guide you through the migration process

Let us be your champion and as we guide you through the best practices and proven ways to navigate API Connect V10:

- How to use the API Connect Migration Utility (AMU)
- How to setup API Connect infrastructure
- Migrating V10 REST APIs
- Upgrade your V5 CLI/DevOps to V10 CLI/DevOps
- Showing how V5c to APIGW Assembly and configurations work

Proven experience – Customer testimonial

Hear what one of our long time large financial services customers had to say about working with iSOA Group:

"I'm the Global Director of IT Operations within my company. I have a team of 22 full time employees and 100 offshore resources reporting directly to me. In choosing and working with a technology vendor, it is important that we evaluate the relationship based on trust and communication lines. I found iSOA group a great technology partner and very customer focused.

I've found them to be especially effective in providing the below solutions/resources in the API Management arena:

1. Quality resources – providing access to technical strong resources in a timely manner
2. Technical savviness – resources have deep experience in multiple technologies which provides more in-depth knowledge to deliver stronger integrations
3. Vendor relations – excellent relationships with key technology partners.
4. Strategy – technical leadership within iSOA provided immense insights to technologies, and worked alongside me to help define and create the service roadmap, as well as working on platform enhancements.

After evaluating and trying larger companies as well as other staffing type models, my experience has been:

1. The iSOA Group is 60-70% more effective than the large vendors
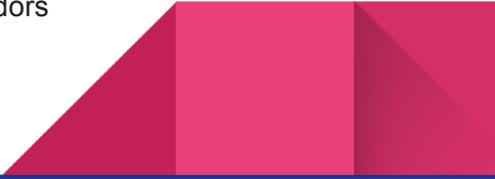

2. Resources managed through the iSOA Group ends up being more efficient and overall cost reduced as we get it right the first time

In summary, I choose to work with iSOA because they deliver what they say with integrity, with aim at quality and technical leadership."
